

## MACS Monitor Vol. XIII No. 5

*Ye are the light of the world. A city that is set on an hill cannot be hid. Matthew 5:14*

---

NEVER buy meat that is marked as "Halal". "Halal" is the term for muslim-compliant food and meat. Some people think that "Halal" must be basically the same as "Kosher". No. Halal meat is slaughtered while the butcher is facing Mecca and screaming "allah akbar". But that isn't the worst of it. Halal kill plants are CONSTANTLY being cited and shut down by the USDA for horrific, horrific infractions. Most of these plants are in Michigan and upstate New York. One of the things that halal kill plants are notorious for is putting already-dead animals in the human consumption line. They will go pick up a dead cow off of a farm or ranch and instead of putting it in their rendering tank where the resulting "tankage" is worth pennies on the dollar as pet food or industrial products, they will shackle the dead animal on the normal kill line and process it as human food which is the highest-dollar product. Since islam teaches dishonesty (taqiyyah) and no regard for one's neighbor, this kind of sickening behavior is standard. Halal plants are also notorious for general citations for filth and uncleanness. In normal cattle slaughter plants... [e]verything is white and men walk around with water hoses and steam guns constantly keeping everything in a state of spotlessness. Halal plants are filthy and unclean. A lot of Halal meat is also labeled as "organic". Again, don't be fooled into thinking that "halal" means "better". It isn't. I would never, ever knowingly eat halal meat purely from a food safety perspective. (hattip: Ann Barnhardt)

---

The MACS Annual Golf Outing & Fundraising Banquet was a great success. Plan to join us next year on Monday July 30, 2012 at Flint Elks Golf Course. Visit [www.macshome.org](http://www.macshome.org) for details.

### Eco-Sanity by Candidate Rick Perry

"I do believe that the issue of global warming has been politicized. I think there are a substantial number of scientists who have manipulated data, so that they will have dollars rolling into their, to their projects. I think we're seeing almost weekly or even daily scientists who are coming forward and questioning, the original idea that man-made global warming is what is causing the climate to change. Yes, our climate's changed, it's been changing for ever-ever since the earth was formed." (August 17, 2011 Citizen Journalist New Hampshire)

---

### State of Michigan launches school performance website

LANSING, Mich. — The State of Michigan launched a school information website on Monday that allows users to look up test scores, enrollment and school "report cards," and that eventually will report on how well high schools prepare students for college, according to the Detroit Free Press. The site, [www.mischooldata.org](http://www.mischooldata.org), was described as a "Consumer Report for schools" by Jim Ballard, executive director of the Michigan Association of Secondary School Principals.

"This is probably the most public-oriented piece we've ever done with education data," Paul Bielawski, school data manager for the Center for Educational Performance and Information, told the Free Press. CEPI maintains a number of statistical databases about Michigan schools. (August 16, 2011)

---

Please pray for our troops standing in harm's way around the world in defense of our liberty, and for the families awaiting their safe return.
